

Info

Persona	I'm an API Provider wanting to register an API Implementation with Fortellis
Motivation	I want to provide an implementation for an API Specification that I found listed on the Fortellis APIs page.
Assumptions	I have a registered and approved Fortellis account. I have looked through the Fortellis APIs and want to provide an implementation for an API Specification

Hover over user on top right

Scroll to
Registered API
Implementation

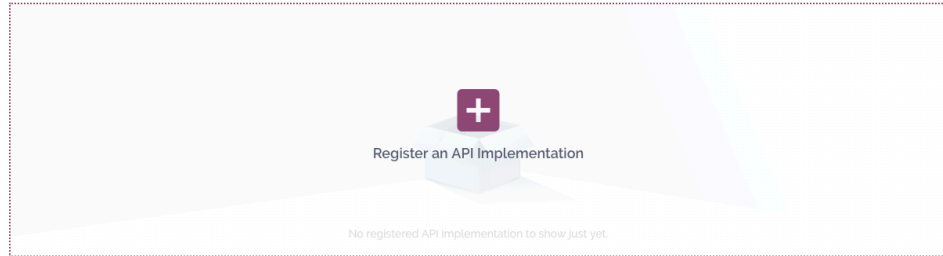

Register an API Implementation

Click Register An API Implementation call to action

Registered API Implementations

In order for a Fortellis API spec call to connect with dealership data, the spec needs to be implemented on the provider system (for example, the DMS). When you register an API implementation, you link Fortellis to its URLs on the provider system host.

Fill out API Implementation Name

Developer Network > Developer Account > Register an API Implementation

Register an API Implementation

1 API Details

2 Pricing and Terms

API Details

Select the Fortellis API spec that you are implementing. If no available API spec aligns with your implementation, you need to first publish an API spec.

Conclusion (final statements)

Review board will look over implementation to make sure it meets standards.

Once approved, the API Implementation status will be “Registered”. The API Implementation Provider Entity Name will appear in the API Providers list under the description of the Connected API in the Connected APIs section of Register a Solution
