

Info

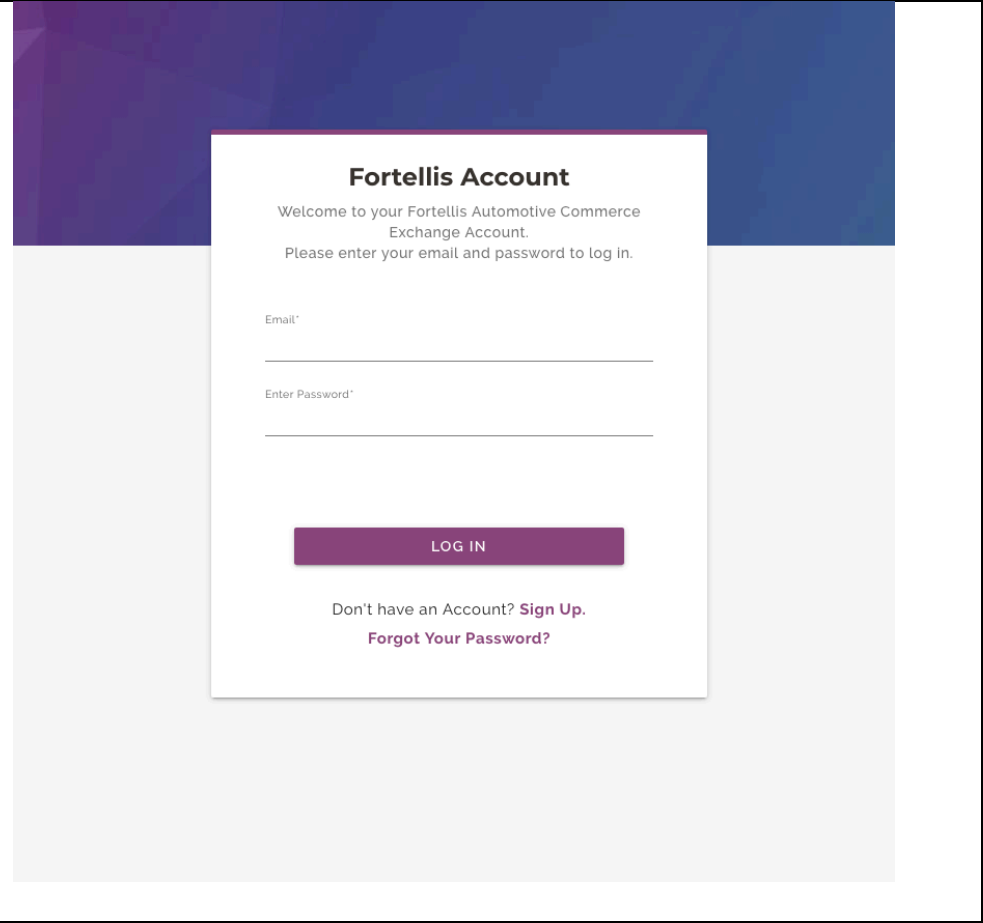

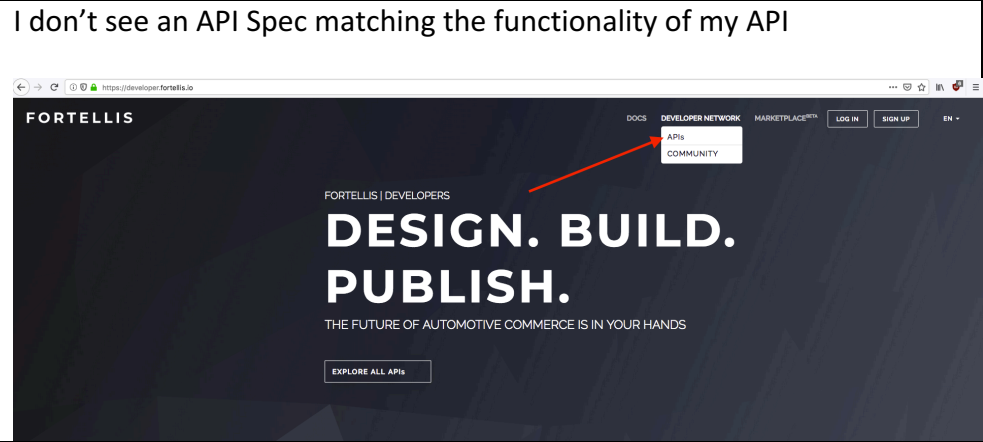

| | |
|-------------|------------------------------------------------------------------------------------------------------------------------------------|
| Persona | I'm an API Publisher wanting to publish an API Spec onto Fortellis |
| Motivation | I want to provide my API for other developers to consume and don't see an existing API Spec that is similar to what my API offers. |
| Assumptions | I have a registered and approved Fortellis account. I have created an API specification detailing my API. |

Links

Published API Specs

PUBLISH AN API SPEC

The API specs on the Developer Network must meet Fortellis design standards. When you publish a new API spec, you submit it here for us to review. When your API spec is approved, open it from the list and publish it to make it available on Fortellis.

| | | | |
|-----------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|---|
| Appointments Updated: 18 Jun 2018 4:38 AM | This API provides the ability for users to search for available appointment slots, book and amend an appointment, amend an appointment, manage requested services, and record status changes | Unknown | ⋮ |
| Demo Spec Updated: 15 Jan 2019 5:45 PM | This is an API specification for demo purposes | Pending Review | ⋮ |
| Finance | This API provides the ab | API Spec successfully submitted. | ⋮ |

Conclusion (final statements)

Will get an email on next steps after submitting.

Review board will look over specification to make sure it meets standards.

Once approved, an option to publish the spec will appear, which makes the spec show in our API references and make it available for API Providers to implement.
